TASK ID

#1

STATUS

Completed

Task Title

React JS Frontend of Ecommerce Website

Description

Design and develop a responsive React JS frontend for an ecommerce website, incorporating features such as product catalog browsing, shopping cart functionality, and secure checkout process, with a focus on user experience and seamless navigation. The application should be built using modern React best practices and adhere to web accessibility standards. The frontend code should be modular, maintainable, and easily integratable with a backend API.
